

JOB ANNOUNCEMENT: COUNTRY MANAGER SOUTH SOUTH AFRICA: CLIMATE SCORECARD PROJECT

The Climate Scorecard Project is seeking a Country Manager for South Africa. We encourage applications from climate change activists, young professionals, graduate students and policy researchers to serve as our Country Manager for South Africa. Experience working in South Africa on environmental and climate change issues is important as is proficiency in English.

Climate Scorecard provides news and action alert messages on the extent to which the 25 top greenhouse gas-emitting countries are adhering to and/or strengthening the climate change related pledges they made to the new UN sponsored 2015 Paris climate agreement. To learn more about our Project, visit <http://www.climatescorecard.org>

Country Managers write short monthly news reports and action alert advocacy messages on policies, programs, events, and activities affecting climate change mitigation in their countries.

This is a part-time supervised position. We estimate that initially the position will entail working on the project for 2-4 hours a week . We are still in start-up mode and presently can offer to reimburse Country Managers for expenses incurred. Should current fundraising efforts be successful all Country Managers will receive a stipend.

Should you wish to apply for a Country Manager position, please email a letter of interest and current resume to roncisrael@gmail.com
